Description

This Copper is the same great wire that I use to make my high quality jump rings and findings. This is SOLID copper so this has a nice substantial weight and it is perfect for light to heavy duty projects. You can hammer, solder, work harden and oxidize it. I rate this wire to be dead soft.

CDA #110 copper, 99.9% pure
Melt Temperature =1981°F (1083°C)
